Battambang's Smart City Projects

- Project 1: Solid and Liquid Waste Management
- Project 2: Urban Street and Public Space Management

Project 1: Solid and Liquid Waste Management

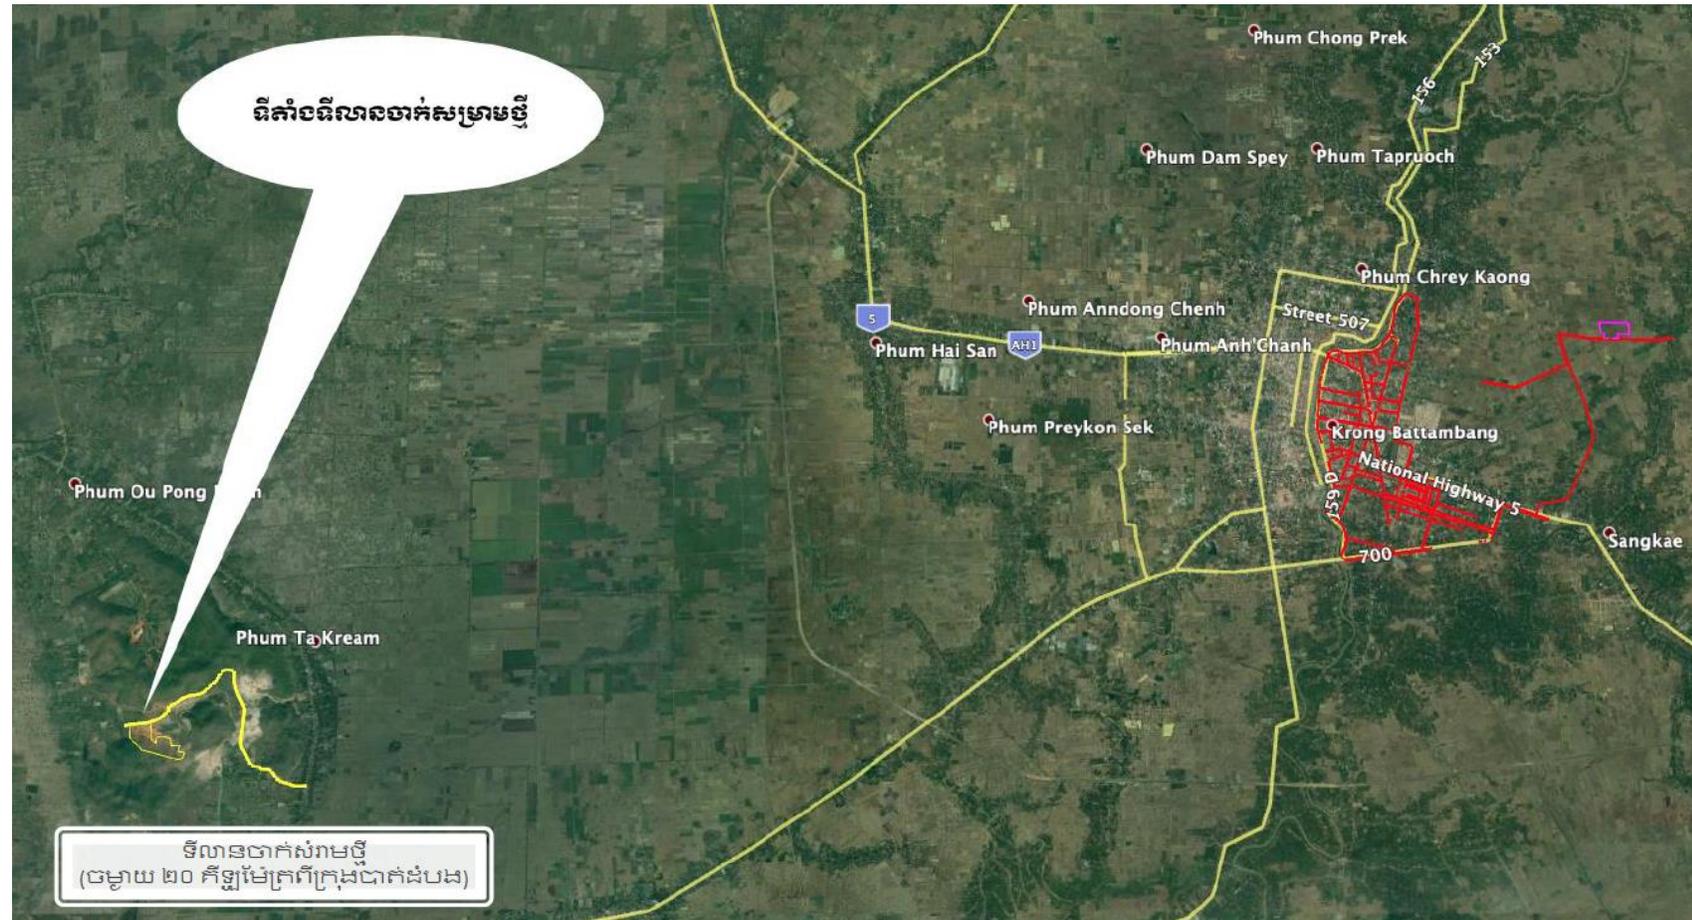

Some solutions:

Project 1: Solid and Liquid Waste Management

- Landfill will reach its maximum capacity in the near future (3 years)

Some solutions:

Project 2: Urban Street and Public Space Management

- Street corridors and public gardens along the Sanger River are used in a diverse way but controversial and irresponsible.

Some solutions:
