SINGAPORE
Comprehensive approach from the national government

City Vision, Definition and Digital Implementation with a USD 1.75 billion to help its digital lives enabled strategy. As a national government, Singapore has implemented programmes to speed more value.

A wide variety of measures that have been taken by small businesses (SMEs) are. For instance, the Smart Grants fund all of the costs of... in their work and development help to delay new capitalised... introduced... innovation amongst... capabilities in... Accelerator that has trained more than 27,000 people in data analytics.

artificial intelligence, and cybersecurity. The Artificial Intelligence (AI) Apprenticeship Programme offers mentorship from experienced AI, big data, and high-performance computing professionals over nine-month long structured training programmes.

Aside from talent and innovation incentives, the City will develop two additional innovation districts, namely Jurong Digital District and the Jurong Innovation District, on top of the current one-month district that houses Rock 71, home to more than 500 start-ups. The new innovation districts aim to foster new industries such as cybersecurity and advanced manufacturing.

Singapore's suite of programmes caters to different stakeholders through a variety of approaches, playing a crucial role in establishing a thriving innovation ecosystem.

Our Methodology

FACTORS USED TO DETERMINE CITY GOVERNMENT RANKINGS

- 1 VISION**
A clear, well-defined, and updated strategy to develop a “smart city”
- 2 LEADERSHIP**
Dedicated City leadership that steers smart city projects without major discontinuities
- 3 BUDGET**
Sufficient and sustainable funding for smart city projects
- 4 FINANCIAL INCENTIVES**
Financial incentives to effectively encourage private sector participation (e.g. grants, rebates, subsidies, competitions) specifically in smart city projects and initiatives
- 5 SUPPORT PROGRAMMES**
In-kind programmes to encourage private actors to participate (e.g. incubators, events, networks, awards) specifically in smart city projects and initiatives
- 6 TALENT READINESS**
Programmes to equip the city’s talent with smart skills
- 7 PEOPLE CENTRICITY**
A sincere, people-first design of the future city, with no systematic disregard for human life or basic human rights
- 8 INNOVATION ECOSYSTEMS**
A comprehensive range of engaged stakeholders to sustain innovation and partnerships where the city government was instrumental in sustaining and catalysing them
- 9 SMART POLICIES**
A conducive policy and regulatory environment for smart city development (e.g. data governance, IP protection, urban design)
- 10 TRACK RECORD**
The government’s experience in catalysing successful smart city initiatives, with no systematic or widespread failure

Our house view of what makes a 'Smart City' takes a **holistic approach**
