Providing Services

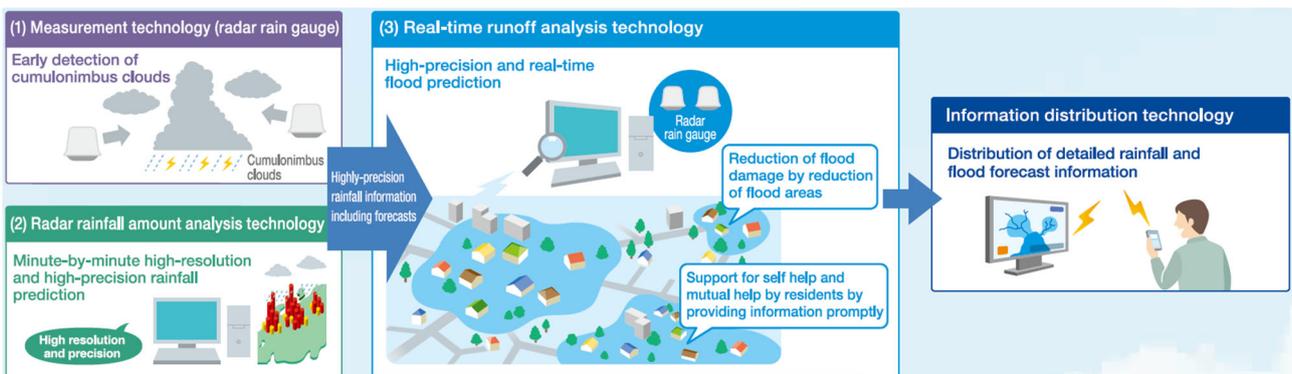

We offer various services, such as the design and construction of facilities for water treatment plants, sewage treatment plants, and waste treatment facilities; the design, manufacture, and sale of various equipment; repair work; and operation management.

Project Achievement / Technical Expertise

<Stormwater Management Technology>

Due to climate change, heavy rain is big problem globally. Thus, METAWATER would like to introduce Stormwater Management Technology that can support residents' safe daily lives.

Stormwater management technology grasps rainfall amounts including early detection of cumulonimbus clouds, predicts of rainfall amounts and intensity, and internal water flooding analysis so that can reduce flood damage by providing support for effective operation of flood control facilities, and by promoting self-support and mutual-support activities among residents such as preparation of sandbags and evacuation.

The effects of this technology are below.
