

Company Profiles

Company Name: Geolonia Inc.

Established: Aug 30, 2019

Headquarters: 2-28-8 Honkomagome,

Bunkyo-ku, Tokyo Bunkyo Green Court Center Office 22F, 113-0021 Japan

Website: <https://www.geolonia.com/>

Core Business:

We specialize in providing a SaaS-based open-source platform for creating and managing digital maps and location intelligence solutions. Our services are designed to be fast, lightweight, and highly customizable, making them ideal for developers and businesses of all sizes. Our key offerings include:

- **Geolonia Maps API:** A simple and powerful API that allows developers to easily embed maps into their websites and applications.
- **Geospatial Data Linkage Platform:** Our platform enables users to connect, manage, and visualize various geospatial datasets, facilitating powerful insights and data-driven decisions.
- **Geolonia Data Services:** Tools for managing and displaying geospatial data, including address search and geocoding services.
- **Open Source Community:** We actively contribute to the open-source community by providing mapping technologies that are free to use and easy to adapt.

Company Name: GeoTechnologies Inc.

Established: May 1, 1994

Headquarters: 2-28-8 Honkomagome,

Bunkyo-ku, Tokyo Bunkyo Green Court Center Office 22F, 113-0021 Japan

Website: <https://english.geot.jp/>

Core Business:

Established in 1994 as a multimedia and software development company, the company has produced digital maps specializing in the automotive industry, with a focus on car navigation systems. The company has since expanded into the GIS industry, and in recent years has been involved not only in map content, but also in applications and marketing services.
